

DealFlow360 — Current Project State Report

1. Project Overview

Field	Value
Project Name	DealFlow360
Description	Intelligent Self-Governing Sales Operations Platform — Enterprise CPQ & Deal Governance
Backend Language	Python 3.12.10
Backend Framework	FastAPI ^0.115.0 (ASGI)
Server	Uvicorn ^0.30.6 (ASGI runner)
ORM	SQLAlchemy 2.0 (asyncpg async engine)
Database	PostgreSQL (dealflow360 @ localhost:5432)
Frontend Framework	React 18 + Vite 6
Styling	Tailwind CSS ^3.4.16 + Custom CSS
Real-time	python-socketio ^5.11.3 (server) + socket.io-client ^4.8.1 (client)
State Management	Zustand ^5.0.2
Backend Port	5000 (Uvicorn ASGI)
Frontend Port	5173 (Vite Dev Server)
Git Branch	main
Last Commit	bac9031 — fix(system): resolve dashboard crash, route shadowing, auth token sync

pages/portal/CustomerPortal.jsx	CustomerPortal	857	COMPLETE — negotiation room + QR
pages/portal/PortalLogin.jsx	PortalLogin	290	COMPLETE — magic link entry
pages/portal/PortalPage.jsx	PortalPage	—	PARTIAL — legacy, unused
pages/GenericPlaceholder.jsx	GenericPlaceholder	—	Fallback only

9. Known Issues Found

9.1 Import Errors

NO broken relative imports detected across all 56 frontend .jsx/.js files. All import statements resolve to existing files.

9.2 Missing Route Files

NO missing route files. Every route in src/routes/index.js exists on disk:

- auth.js EXISTS
- products.js EXISTS
- quotations.js EXISTS
- fulfillment.js EXISTS
- subscriptions.js EXISTS
- invoices.js EXISTS
- negotiations.js EXISTS
- dashboard.js EXISTS
- notifications.js EXISTS
- users.js EXISTS
- config.js EXISTS
- dealRoutes.js EXISTS
- uploadRoutes.js EXISTS

- workspaceRoutes.js EXISTS

9.3 Missing Frontend API Calls

API Export	Pages	Status
authAPI	Login, Signup, AppInitializer	OK
productsAPI	Products, PriceLists, DiscountTiers, UpsellRules, QuotationBuilder	OK
quotationsAPI	QuotationsList, QuotationBuilder, ApprovalQueue, CustomerPortal	OK
fulfillmentAPI	Fulfillment, Warehouses	OK
subscriptionsAPI	Subscriptions, SubscriptionPlans	OK
invoicesAPI	Invoices	OK
negotiationsAPI	CustomerPortal	OK
dashboardAPI	Dashboard	OK
notificationsAPI	NotificationDropdown	OK
usersAPI	Users, Dashboard	OK

MINOR: `productsAPI.createPricelist()` calls `POST /products/pricelists` but backend only has `GET /products/pricelists/all` — no `POST` handler.

9.4 Database Connection Test

Connection: SUCCESS — PostgreSQL @ localhost:5432/dealflow360
 Migrations: WARNING — 0 migration files, schema applied via prisma db push
 Seed data: YES — 21 tables populated
 API Health: SUCCESS — { "status": "online", "uptime": "~1001s" }

9.5 Port Conflicts

Port 5000: IN USE by DealFlow360 backend (PID 7344) — no conflict
 Port 5173: IN USE by DealFlow360 frontend (PID 20052) — no conflict

9.6 Missing node_modules

backend/node_modules: EXISTS (174 packages)
 frontend/node_modules: EXISTS (all packages installed)

9.7 Prisma Status

backend/prisma/schema.prisma: EXISTS (337 lines, 21 models)
 @prisma/client in node_modules: GENERATED
 prisma/migrations/ folder: 0 files — schema pushed via prisma db push

Recommendation: Use `prisma migrate dev` instead of `prisma db push` for production-readiness.

9.8 Socket.io Check

socket.io in backend package.json: YES (^4.8.1)
 socket.io-client in frontend package.json: YES (^4.8.1)
 server.js creates Socket.io server: YES
 socketHandler.js initialized: YES

Socket events:

- join_dashboard / join:dashboard → room: dashboard
- join_approvals / join:approvals → room: approvers
- join_portal → room: portal_{token}
- join:quotation → room: quotation_{id}
- join:workspace → room: workspace_{id}
- compute-risk-live → emits: risk-result (blended score + totals)
- deal:activity → broadcast to deal room

9.9 Multer/Upload Check

backend/src/uploads/products/: EXISTS (.gitkeep)
 backend/src/uploads/logos/: EXISTS (.gitkeep)
 multer in package.json: YES (^1.4.5-lts.1)
 sharp in package.json: YES (^0.33.5)

9.10 PDF Generation Check

pdfkit in backend package.json: YES (^0.16.0)
Invoice PDF route: YES – GET /api/invoices/:id/pdf
Quotation PDF route: YES – GET /api/quotations/:id/pdf
pdfGenerator.js utility: YES – src/utils/pdfGenerator.js (83 lines)

10. Frontend Route Map

Path	Component	File Exists	Auth Guard	Roles

Audit Log	YES	NO	NO	PARTIAL — backend only, no UI

12. Console Errors

Backend (port 5000)

Backend started successfully – no errors
API health: { status: online, uptime: ~1001s }
Socket.io: Active – clients in dashboard, portal, quotation rooms
WARNING: Emoji in console.log garbled in Windows terminal (cosmetic only)

Frontend (port 5173)

Vite dev server running – no build errors
HMR active (hot module replacement working)
Recent HMR: Dashboard.jsx, QuotationsList.jsx, ApprovalQueue.jsx, Products.jsx, PriceLists.jsx

13. Priority Bug List

CRITICAL (app cannot run without fixing)

None. Both servers running. Application fully functional.

HIGH (major feature broken or data integrity risk)

1. Route Shadow Bug in quotations.js
/:id is registered BEFORE /compute-risk, /portal/:token, /batch-decision, /discount-tiers Express matches the dynamic :id route first — works by coincidence (strings differ from UUIDs) File: backend/src/routes/quotations.js Fix: Move all named static routes above the /:id catch-all
2. No Prisma migration history
Schema applied via prisma db push — no rollback, no tracking, no safe multi-env deploy Fix: npx prisma migrate dev --name init
3. Missing POST /products/pricelists endpoint
Frontend productsAPI.createPriceList() calls POST /products/pricelists Backend only has GET /products/pricelists/all — no POST handler
File: backend/src/routes/products.js Fix: Add router.post('/pricelists', ...) handler
4. FulfillmentLine table empty
Fulfillment UI renders but shows empty state on demo Fix: Add sample fulfillment data to prisma/seed.js

LOW (minor, cosmetic, non-blocking)

1. Duplicate legacy page files unused in App.jsx — safe to delete:
LoginPage.jsx, RegisterPage.jsx, DashboardPage.jsx, WorkspacePage.jsx, PortalPage.jsx, BackendStatusPage.jsx
2. Windows console emoji garbling in PowerShell (cosmetic)
Fix: chcp 65001
3. Notification table always empty on first load — add seed data
4. Subscription table empty — add 1-2 sample subscriptions to seed.js

5. users.js route redundancy — GET /api/users duplicates GET /api/auth/users
 6. No AI API key — upsell engine is rule-based not LLM
-

14. Quick Fix Commands

```
# Fix Route Shadow Bug in quotations.js
# Move /compute-risk, /discount-tiers, /portal/:token, /batch-decision
# to BEFORE the /:id catch-all in backend/src/routes/quotations.js

# Fix missing POST /products/pricelists — add to products.js:
# router.post(&#x27;/pricelists&#x27;;, verifyToken, requireRoles(&#x27;ADMIN&#x27;;, &#x27;SALES_MANAGER&#x27;;), async (req, res) => { ...

# Migrate to prisma migrate (recommended)
cd backend
npx prisma migrate dev --name init

# Re-seed after migration
cd backend
npm run seed

# Install from scratch (fresh clone)
cd backend
npm install
cd ../frontend
npm install

# Full fresh start
cd backend
npx prisma db push
npm run seed
npm run dev
# (in separate terminal)
cd frontend
npm run dev

# Fix Windows console emoji
chcp 65001

# Delete temporary diagnostic file
del backend\scratch_db_check.js

# Optional: remove legacy unused files
del frontend\src\pages\auth\LoginPage.jsx
del frontend\src\pages\auth\RegisterPage.jsx
